

KEERTHEESWARAN J

Frontend Developer

8072278787 | keertheeswaran01@gmail.com | Coimbatore, Tamil Nadu

PROFILE SUMMARY

I am an experienced web developer with three years of expertise in React, specializing in building user-friendly applications. My focus is on creating responsive and visually appealing web interfaces that enhance user experience. I have hands-on experience working with Redux for state management and Node.js for backend integration. I am also skilled in integrating front-end designs with .NET Core backends to ensure seamless functionality. Currently, I am expanding my skill set by learning React Native to develop cross-platform mobile applications. I am passionate about delivering high-quality solutions that effectively meet user needs and create engaging digital experiences.

SKILLS

- React JS
- Redux
- HTML & CSS
- Bootstrap
- Tailwind CSS
- Node.js
- React Native
- Figma
- Adobe Photoshop

WORK EXPERIENCE

Frontend Developer

Anga Information Technology

Walaa Insurance Projects (Client Projects)

- **Facultative Project** – Enhanced a React-based reinsurance application with quotation forms, approval workflows, and secure role-based access for general and approval users.
- **Online Claim System** – Developed a React-based claim management platform for tracking, reviewing, and managing insurance claims efficiently.
- **Medical Reimbursement Portal** – Executed management login features and Excel-based bulk upload/update functionality to handle large-scale reimbursement data across multiple portals, including report generation and multi-view data management.
- **EKYC Data Entry System** – Developed and refined a large-scale data entry request page with optimized UI/UX, enabling efficient submission and management of verification data.
- **EKYC Approval Module** – Upgraded an admin-focused module for verifying, approving, and processing EKYC requests across multiple pages with structured workflows.
- **Missing Document Management** – Built a document upload system supporting two client-based entry flows with conditional upload logic and refined UI/UX for document handling.
- **CRM Enhancements (Case Closure & Communication)** – Boosted the CRM system by developing pages for Case Closure, Email Request/Survey, and Missing Document management to streamline customer interaction and document processing.

- **Globemed Monitor** – Applied management login functionality and Excel-based bulk data upload/update features for efficient large-scale data handling.
- **Workshop Agency Portal** – Designed and upgraded the UI/UX and functionality for the workshop agency management system.
- **Workshop Admin Portal** – Refined the admin interface for workshop management with improved UI/UX and operational features.
- **Life Broker Portal** – Designed and executed the UI/UX and functionality for the Life Broker management platform.

Other Client / Business Projects

- **Academy Project** – Enhanced an online course management platform using React with separate admin and user roles for course creation, management, and enrollment.
- **Bus Tag (2024)** – Developed a React-based front-end for a bus tracking system featuring route mapping, fare calculation, and seamless integration with a .NET backend.
- **Mech Place (2023)** – Built a React-based web application for car and bike service booking with nearby service listings and service-type selection.
- **Anga Project Management (2023–2024)** – Designed and developed a React-based employee management system with leave requests, live project tracking, and multi-role authentication.
- **Green Apple Website (2023)** – Expanded a responsive website with an API-powered contact page to strengthen user communication.

EDUCATION

Master of Science in Information Technology

Bharathiar University

Bachelor of Science in Information Technology

Sri Sangara Bhagavathi Arts & Science College
